---

## Project Work:

- **Portfolio Website:** It's a curated digital showcase of our best work, a visual testament to our skills, and a virtual handshake with potential clients or employers. Website portfolios are easily editable, shareable via email or social media, and more sustainable.  
**Technologies Used:** HTML, CSS, JavaScript.
- **Smart Health Care System:** Developed an intuitive and user-friendly online platform for searching and booking appointments with doctors. The platform aims to streamline the process of finding healthcare professionals and scheduling consultations based on user preferences, availability. **Technologies Used:** HTML, CSS, JavaScript, JSP, Servlet, JDBC, SQL.

- **Fit Life-Landing-Page:** Objective: Create a compelling landing page that encourages sign-ups and showcases Fit Life Gym's facilities, programs, and promotions.  
Target Audience: Fitness enthusiasts, beginners looking to start their fitness journey, and individuals seeking personal training or wellness programs.  
**Technology Used:** HTML, CSS, JavaScript
- **Banking System:** The goal of this project is to develop a secure, efficient, and user-friendly banking system that enables users to manage their financial transactions, accounts, and customer services online or via a standalone application.  
**Technology Used:** HTML, CSS, JavaScript, Java, JDBC, Servlet, SQL
- **HR Harmony Administration Service:** Managed comprehensive HR services, including employee onboarding, payroll processing, benefits administration, and compliance with labor laws, ensuring a harmonious and efficient workplace.  
**Technologies Used:** Python, Django, SQL, HTML, CSS, JavaScript
